VDO POWER WINDOW SYSTEMS

Our power window lift line includes window lift motors, regulators, motor/regulator assemblies, and gear kits. Like all VDO auto service products, they deliver OE fit, form, and function and are built in ISO-certified facilities. Their long life motors, gears, and housings help ensure long service life.

If a window lift motor, regulator, or motor/regulator assembly needs replacement, make sure the job gets done right the first time. VDO door systems are built to restore proper performance and work flawlessly for years. Customers stay happy, and your shop's reputation is protected.

VDO

Causes of electric window system failures

Reasons for fuel pump and fuel module failures include:

/ **Wear and tear:** Stripped internal gears, or electrical faults can cause the window lift electric motor to fail over time.

/ **Cable failure:** Worn cables or snapped plastic clips or pulleys can result in a mechanical failure of the window lift.

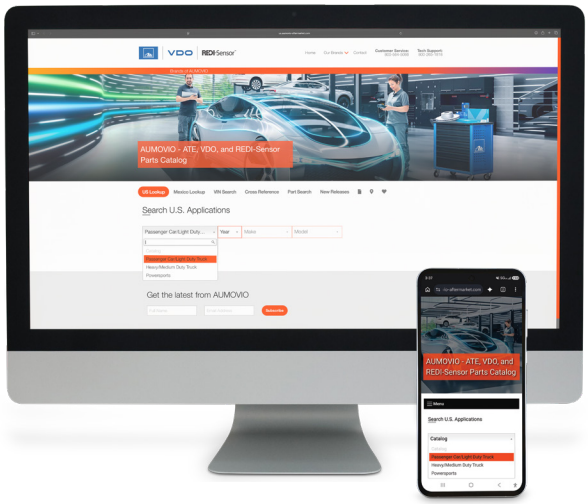

SERVICE INDICATIONS

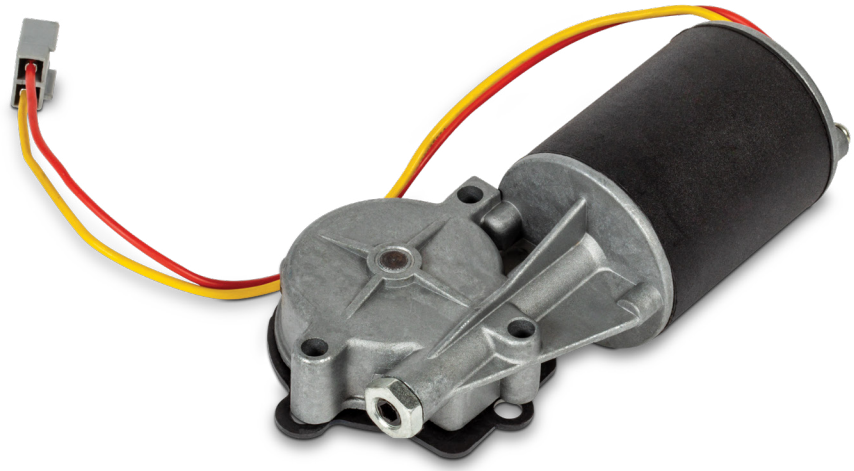

Window stuck in place	●
Dropped window (inside door)	●
Crooked or uneven window movement	●
